# ACTRONCONNECT

Wireless control of your air conditioner  
at your fingertips.

*That's better. That's Actron.*

**ActronAir**

# ActronAir. Because Australia needs Australian air conditioning.

The year 1984 saw Advanced Australia Fair become our National Anthem, the 1 dollar coin come into circulation and a small family air conditioning business open its doors. Today, ActronAir is a proud Australian company recognised for making world-class air conditioners. Well, it stands to reason. The team at ActronAir experience our harsh Australian conditions first hand, and our climate places demands on air conditioning not found in other parts of the world.

And that's why ActronAir's engineers have developed the most advanced air conditioning systems specifically for the unique and harsh Australian environment.

## Make a connection with comfort

Whether you're home or away, ActronConnect gives you wireless control of your ActronAir ducted system. It's an App with a clean design and easy-to-use controls, and it makes setting your perfect comfort level as simple as a single touch of your phone, tablet or computer.

  
**More than  
 a quarter of a  
 million Aussies  
 take comfort in  
 ActronAir**

“ Nothing beats performing under extremes. Engineered for Australia, you can trust ActronAir to be there when you need it most. ”

**Mark 'Frosty' Winterbottom**  
 2015 V8 Supercars Champion

# Better Design

## Colour-coded smarts

Unlike a lot of air conditioning controls that use confusing icons and international symbols, ActronConnect is colour-coded for simplicity. There's blue for cooling, red for heating, green for fan-only operation and purple for our set and forget auto function.

### Heating

Get your home all cosy before you walk in the door.

### Cooling

Nobody likes coming home to an oven in summer. Keep your cool from the moment you walk in the door.

### Fan only

Sometimes you only need some air circulation at home to get comfortable. The great thing with this option is it saves on your power bill too.

### Auto

Automatically cool or heat your home remotely with ActronAir's set and forget auto function.

## Take a closer look

### Power button

Turns air conditioner on/off

### System status

Indicator displays whether the system is currently 'heating' or 'cooling'

### Current temperature

### User set temperature

### Arrow buttons

Press to set the temperature up or down

### Mode settings

Cool, Heat, Fan and Auto modes

### Fan speed

Select between three fan speeds

### ESP indicator

If enabled, ESP logo will light up

# Better Control

## Full zone control

The zone screen gives you easy control over which zones are on and off. You can give each zone the name you prefer: Kate's Room, TV Room, Man Cave – whatever you like. And if you have an ActronAir Ultima upgraded system, the actual temperature of each zone is also shown.

It's all fast and intuitive, just like air conditioning should be.

### Rename button

Select or customise the zone labels in your home

### Zones

Viewing the zones in your home

### Zone on/off button

### ESP Ultima display

Only available with ESP Ultima and ESP Platinum Ultima models, displays temperature of the zone

## Set and forget timer

You shouldn't have to plan your day around your air conditioning, it should be flexible enough to suit you. With the timer function, you can use ActronConnect to set up a countdown to either turn your air conditioning system on or off when it suits you best.

This set and forget function is ideal for those who live busy lives. Instead of having to remember to turn your system on or off, you can simply set the timer once and then get on with your day. No more worrying about whether you've turned the system on in time, it's all set and ready to go.

Another great benefit of the timer is for those situations when you know you will have no access to Wi-Fi. For example, if you know you're going to be on a flight, you can simply set the timer to turn the system on in time for you to arrive home in absolute comfort.

### Timer

Control ON/OFF timer

### Set time indicator\*

Displays the time you set for your air conditioner to turn ON or OFF

### Timer increment in minutes

Scroll up or down to set the minutes in either in 00 or 30 minutes

### Timer increment in hours

Scroll up or down to set the hours from 0 to 24:00 hours

### Timer set button

Press to accept the timer

\*To activate ON timer, the unit will need to be in OFF status.  
To activate OFF timer, the unit will need to be in ON status.  
This timer feature is NOT synchronised to your wall control timers.

## Wireless control at home or away

### Get the bedroom ready from the lounge

Let's face it, even at home it's handy to be able to control your whole home's air conditioning from the comfort of your favourite chair. ActronConnect is the ultimate air conditioning remote control. Cool the bedroom before you head up to sleep, or get the kitchen cosy and warm before you get out of bed on a chilly winter's morning.

### Innovative technology makes it look easy

ActronConnect comes with a module that can be hidden away in your roof space or cupboard and can be easily accessed when required.

Its long-range antenna provides extensive Wi-Fi connectivity all around the home. And when you're down the road, or on the other side of the globe, you can connect with the ActronAir Internet Cloud which communicates back to your home. Either way, complete comfort is in the palm of your hand.
